## Forged ISO-certificate

We found forged ISO-certificates on diverse Chinese websites.

A company named HuKe & Co. GmbH and/or its trading partner Jiao ZuoTianRun Hengtong trading company have manipulated our certificates ISO 9001 and VDA 6.4. The certificates have been forged and they have been used for unfair practices to simulate that their certified products have been manufactured in Germany.

The company MAE Maschinen- und Apparatebau Götzen does not have any contact to these companies.

We have already started proceedings to stop this misuse.

As a manufacturer of special machines we only produce machines and the corresponding spare parts according to our product catalogues and our Internet presence.

The products are sold only by us and our trading partners expressly mentioned in the Internet.
